

Dear Bill Kennard,

We, the students of KAMP Student Radio, at the University of Arizona would like to express our support for the implementation of a low power FM radio frequency. With the low power FM frequency license, our station could broadcast to the over 35,000 students on our campus and over 800,000 members of the Tucson community. KAMP Radio has had 11 years of tradition here at the UA, providing valued experience in radio to the students of our university, despite having a non-detectable AM transmitter.

We are excited about the opportunity to develop a greater listenership and are committed to the ideals and standards of the FCC.

A. D. T

Dear Bill Kennard,

We, the students of KAMP Student Radio, at the University of Arizona would like to express our support for the implementation of a low power FM radio frequency. With the low power FM frequency license, our station could broadcast to the over 35,000 students on our campus and over 800,000 members of the Tucson community. KAMP Radio has had 11 years of tradition here at the UA, providing valued experience in radio to the students of our university, despite having a non-detectable AM transmitter.

We are excited about the opportunity to develop a greater listenership and are committed to the ideals and standards of the FCC.

Dear Bill Kennard,

We, the students of KAMP Student Radio, at the University of Arizona would like to express our support for the implementation of a low power FM radio frequency. With the low power FM frequency license, our station could broadcast to the over 35,000 students on our campus and over 800,000 members of the Tucson community. KAMP Radio has had 11 years of tradition here at the UA, providing valued experience in radio to the students of our university, despite having a non-detectable AM transmitter.

We are excited about the opportunity to develop a greater listenership and are committed to the ideals and standards of the FCC.

Dear Bill Kennard,

We, the students of KAMP Student Radio, at the University of Arizona would like to express our support for the implementation of a low power FM radio frequency. With the low power FM frequency license, our station could broadcast to the over 35,000 students on our campus and over 800,000 members of the Tucson community. KAMP Radio has had 11 years of tradition here at the UA, providing valued experience in radio to the students of our university, despite having a non-detectable AM transmitter.

We are excited about the opportunity to develop a greater listenership and are committed to the ideals and standards of the FCC.
